

In the Specification:

At page 112, last paragraph, please amend the specification as follows:

--The sequence of the peptide used for immunization was
GTINVHDTVETQFNQYKTEAASPYNLTISDVSVSDVPFPFSAQSGA (var-PSMGFR SEQ
ID NO: 7). Two rabbits were immunized using the ~~Polyquick~~TM POLYQUICKTM method, a
proprietary commercially available technology. After four weeks bleeds were evaluated for
PSMGFR specific antibodies. The rabbits received an additional boost of antigen two weeks
before harvesting the antibody. The antibody was affinity purified using the peptide
conjugated to a column support.--
